DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 40-51, 54-57, 62 and 63, drawn to broadcasting synthesized image data.

Group II, claim(s) 52 and 58, drawn to broadcasting link address information.

Group III, claim(s) 53 and 59, drawn to broadcasting position information of a pointer.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons (as stated in the International Search Report):

3. No special technical feature within the meaning of PCT Rule 13.2, second sentence (hereinafter, referred to "a special technical feature") common to these groups of inventions can be seen.

The matter common to the aforementioned three groups relates to live streaming.

However, this matter is not novel (e.g., see JP2003-91472A, JP 2003-92806 A).

This matter makes no contribution over the prior art and cannot be a special technical feature.

As for claims 52 and 58 and claim 53 and 59, there is a common matter relating to output of information on browser in live streaming. However, this matter is not novel, either (e.g., see JP 2003-92706 A (for example, paragraph [0094])). This matter makes no contribution over the prior art and cannot be a special technical feature.

Accordingly, claims of this application are divided into the three groups as has been described above according to the matters which may be special technical features. That is, this application describes three groups of inventions in total.

4. A telephone call was made to Richard R. Michaud (Reg. No. 40,088) on 6 April 2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to RICHARD M. BEMBEN whose telephone number is (571)272-7634. The examiner can normally be reached on 8:30AM-5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Ometz can be reached on (571) 272-7593. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
